

FIRST DAY, 06 June, 2019 (Thursday)

Athletic dome «Harmony», Tomsk, 7 Vysotsky street, building 6.

Time	Plenary hall	Sessions hall №1	Sessions hall №2	Sessions hall №3	Sessions hall №4	Sessions hall №5	Practical sessions hall
8.00-18.00	Registration of participants						
9.00-10.50	First plenary meeting.						
10.50-11.00	Break						
11.00-13.00	Second plenary meeting.						
13.00-14.00	Break						
14.00-15.45	The joint session of European Cardiac Arrhythmia Society and the all-Russian scientific society of Arrhythmologists.	How to beat a monster or a comprehensive approach to the diagnostics and treatment of the atrial fibrillation. Part 1: diagnostics in patients with the implantable devices. (Supported by Medtronic).	Rhythmia: experience in Russian clinics. (Supported by Cardiomedics).	Practical aspects of the management of patients with the arrhythmogenic electrical storm. (The session is RCME accredited).	Complicated arrhythmias. Problems in the diagnostics and treatment of patients with the cardiac arrhythmias. (Supported by Biosense Webster).	Non-pharmacological treatment of the persistent atrial fibrillation - modern opportunities and ways to improve results.	Moderated posters. Session 1.
15.45-16.00	Break						
16.00-18.00		State of Art in CPT implantation. Clinical workshop. (Supported by Medtronic).	Subcutaneous defibrillator – a journey of 17 years. (Supported by Cardiomedics).	Cardioneurology, new horizons. (The session is RCME accredited).	Sudden cardiac death. Prediction and prevention at the present time. Part 1. Search for the substrate and triggers.	The atrial fibrillation. Hybrid methods of treatment.	Moderated posters. Session 2.
18.00-18.30	Opening ceremony. Plenary hall.						

SECOND DAY, 07 June, 2019 (Friday)

Athletic dome «Harmony», Tomsk, 7 Vysotsky street, building 6.

Time	Plenary hall	Sessions hall №1	Sessions hall №2	Sessions hall №3	Sessions hall №4	Sessions hall №5	Practical sessions hall
8.00-18.00	Registration of participants						
8.30-10.45	Third plenary meeting.	From Khabarovsk to Kaliningrad. 10 years of the cardiac arrhythmias treatment in the federal centers of the cardiovascular surgery.	Diagnostic opportunities of a new method of a remote round-the-clock online ECG monitoring in patients with heart arrhythmias. The remote control of the treatment effectiveness.	Drug therapy of the atrial fibrillation: complex issues in simple words.	Sudden cardiac death in childhood: risk stratification, optimal approaches to prevention and treatment.	Experts about Arrhythmology.	Experts about the atrial fibrillation. Therapy in various clinical situations. (Supported by Bayer)..
10.45-11.00	Break						
11.00-13.00	Fourth plenary meeting.	Sudden cardiac death. Joint Symposium of the all-Russian scientific society of Arrhythmologists, Symposium of the silk road heart rhythm society together with Kazakh society of arrhythmologists.	Unique research on the cryoballoon isolation of the pulmonary veins.	Drug cardioversion in the atrial fibrillation.	Implantable antiarrhythmic devices in children - new technologies, opportunities and risks.	Sudden cardiac death. Prediction and prevention at the present time. Part 2. The primary and secondary prevention of the sudden cardiac death at the present time.	Diagnostics and treatment of the atrial tachyarrhythmias.
13.00-14.00	Break						
14.00-15.45	Educational interactive practical course in cooperation with the Foundation for Cardiology education in Central and Eastern Europe CARDICA	Pacing for experts: analysis of complex cases from clinical practice. Clinical workshop. (Supported by Medtronic).	How to beat a monster or a comprehensive approach to the diagnostics and treatment of the atrial fibrillation. Part 2: Cryo Club – State of Art in the cryoablation of the atrial fibrillation. (Supported by Medtronic).	Thorascopic or interventional approach in the treatment of patients with the persistent atrial fibrillation.	Diagnostics and treatment of tachyarrhythmias in children.	Prevention of the sudden cardiac death. (The session is RCME accredited).	Masterclass on Rhythmia system. (Supported by Boston Scientific).
15.45-16.00	Break						
16.00-18.00	Russian-Israeli Symposium.	Accuracy is important: modern technology of mapping and ablation of the atrial fibrillation. (Supported by Abbott).	Results of the cryoballoon pulmonary vein isolation. Ways to improve the efficiency.	Various aspects of the interventional treatment of the atrial fibrillation.	Particular aspects of the pediatric cardiology. Complex clinical cases.	Unsolved problems of the ventricular arrhythmias treatment in persons without structural heart disease. (The session is RCME accredited).	Holter monitoring in Arrhythmology: difficulties and errors.

THIRD DAY, 08 June, 2019 (Saturday)

Athletic dome «Harmony», Tomsk, 7 Vysotsky street, building 6.

Time	Plenary hall	Sessions hall №1	Sessions hall №2	Sessions hall №3	Sessions hall №4	Sessions hall №5	Practical sessions hall
8.00-18.00	Registration of participants						
8.30-10.45	Pacing complications.	Discussion: Surgical approach in arrhythmias treatment.	Digital medicine in Arrhythmology	Role of implantable devices in the treatment of the chronic heart failure. Consent or different opinions? (Supported by Cardiomedics).	Morphological diagnostics of myocarditis. Role of the endomyocardial biopsy.	Catheter ablation of the atrial fibrillation in the clinical practice of cardiologist. Clinical workshop.	Secrets of programming. Masterclass.
10.45-11.00	Break						
11.00-13.00	Patient with implantable device infection: diagnostics, extraction and reimplantation. (Supported by Philips and Cardiomedics).	Arrhythmias and AV conduction disorders in transcatheter heart valve implantation (TAVI).	Atrial fibrillation in patients with the chronic kidney disease. Clinical workshop (The session is RCME accredited).	Panel discussion. Problems of the cardio resynchronization devices.	Unsolved problems of clinical Arrhythmology. Case based symposium.	Treatment of patients with the atrial fibrillation and low left ventricular ejection fraction.	Strategy for minimizing shocks in ICD patients. Clinical guidelines and technical implementation.
13.00-14.00	Break						
14.00-15.45	Modern view on the problem of the myocardial damage: innovative methods of heart failure therapy (Supported by Abbott).	Interventional methods of treatment of the ischemic ventricular tachycardia.	Syncope: simple and complex. Clinical workshop. (The session is RCME accredited).	Management of patients with CPT - cardiologist's view. Joint session of the associations of young Cardiologists of Tomorrow, Young Electrophysiologists and Heart Failure Specialists of Tomorrow.	My top five studies in the treatment of cardiac arrhythmias in 2018-2019.	Modern methods of the non-invasive diagnostics in Arrhythmology.	Controversial and unsolved problems of clinical Arrhythmology.
15.45-16.00	Break						
16.00-18.00	Prevention of stroke in patients with the atrial fibrillation. Errors and complications of anticoagulant therapy.	New in the studied issues of treatment in patients with antiarrhythmic devices.	Heart arrhythmias during pregnancy.	New ultrasound technologies in heart failure patients.	Clinical electrophysiology in detail. Clinical workshop. Situational tasks.	Problems of the cardiac resynchronization therapy when recommendations and RCT are not enough.	Non X - ray technologies in the treatment of arrhythmias.
18.00	Summary. The closing of the Congress.
